Project Details

Project Name	Bearish OS
Technologies	React js
Description	There was a website for managing work tasks where employee records were kept according to their projects. Bearish OS is a type of operating system that includes features like tracking employee tasks, video call meetings, chats, to-do lists, notes, emails, and a workspace.
Role	I was involved in working on the Login, Sing Up UI and functionality and Implemented API

Project Name	Jumbo Career
Technologies	React js, Typescript, MUI components , Jest for testing
Description	It was an online learning platform-based site where students can learn and teachers can find jobs, etc. The users have to register as students, instructors, or recruiters, specifying their expertise in the respective fields. The platform provides facilities for users to chat and offers videos and unit tests for students. It also allows students, instructors, and recruiters to track their progress.
Role	I worked on the Login/Signup flow, Forgot and Reset Password, Implemented Social Login, Sidebar, Header, and Dashboard with Charts, created a question and answer section for students, and Implemented API. Write a test case for this work.

Project Name	Amar cms
Technologies	React js , MUI components
Description	This is a website for a pharmaceutical company. The purpose of this website is to facilitate direct orders from medicine suppliers to pharmaceutical companies. There are three distinct types of logins available on this site: administrator, manager, and supplier.
Role	Working on login and forgot password page, table pagination with API integration for stock management. Includes functionality to add and remove stock, as well as generate PDF bills.

Project Name	Poacklog - cookandboardman
Technologies	React js , MUI components
Description	It was a lot of data for the cook and boardman groups for supplier, division, and assignee. Check for customer PO and implement these PO details based on this division user type. show which table for which customer PO is generated in which division, and also show all details for this customer PO. We can also set rules for customers to set this customer division, supplier, and assignee.
Role	I am working on this project for Microsoft Login. Dashboard table with filter and pagination. Customer po pdf, po details edit and delete. working on a rule page for add,edit, delete, and clone functionality with formic validation.Light-Dark mode, font size small ,medium and large.

Project Name	Cycle Vita App
Technologies	React js , Typescript, MUI components , Jest for testing
Description	A comprehensive web application for healthcare management, featuring modules for patient data recording, event scheduling, and analytical reporting. Includes customizable settings, resource access, and contact management. Supports PDF export and provides trends visualization for effective patient care.
Role	I am working on this project for schedule events, the profile page, onboarding Guilde, the logbook all-page UI, functionality, and API integration.
